# WMF espresso

### THE PERFECT ESPRESSO, HANDMADE AUTOMATICALLY.

"I want my customers to enjoy the real espresso experience, even when there is no fully trained barista at the bar. With the WMF espresso I know that every single cup will be perfectly prepared, with the personal touch that coffee lovers expect."

The award-winning WMF espresso em- 100% consistency. So, if you're used to result is unrivalled coffee quality with fers the best of both.

bodies all the barista flair and quality fully automatic machines, it represents of the traditional portafilter machine a step up to the authentic espresso exwhile at the same time delivering the perience, but without the need for any simplicity and consistency of fully au- time-consuming barista training. For tomatic machines. Its classic look and those familiar with traditional portafilsensory cues - like hissing, steaming ter machines, on the other hand, it ofand knocking - evoke the emotions of fers the advantage of consistently high the espresso bar, but the trickier parts coffee quality, regardless of the user's of the process are automated to ensure level of skill and experience - ideal for reliably superb results. ### FOR WMF CUSTOMERS, THE FUTURE COMES AS STANDARD.

Winner of both the iF Design Award and the Red Dot "best of the best" design award, the WMF espresso combines the stylish look and feel of a traditional portafilter machine with superb performance and groundbreaking ease of use.

The WMF espresso is a standard bearer technology guarantee the versatility, tamping, and Dynamic Coffee Assist into the future.

. . . . . . . . . . . . . . . .

## Performance DELIVERING A PREMIUM COFFEE EXPERIENCE

. .

WMF espresso

#### TWO INTEGRATED GRINDERS

The WMF espresso's two integrated grinders are equipped with precision-honed grinder disks to allow very fine grinding, ensuring an outstanding quality of espresso. Coffee grounds are delivered directly into the brewer via a closed internal channel, eliminating any waste.

Recommended for venues with an average daily requirement of 300 cups, the WMF espresso is designed for high quantity as well as high quality. So you can be confident that nobody will have to wait for a delicious coffee, even in high-volume situations.

#### **AUTOMATIC TAMPING**

With the WMF espresso, consistency is guaranteed by automation of all key steps, so coffee quality does not depend on the skill of the user. First, the machine automatically doses the correct amount of coffee directly into the portafilter. The coffee is then tamped automatically with the ideal pressure and 100% consistency, ensuring the perfect espresso every time.

#### **OPTIONAL SECOND AUTO STEAM WAND**

Instead of Basic Steam, an optional second Auto Steam wand can be chosen in order to optimise the handling time in your business.

#### PARALLEL PREPARATION

To let you keep pace with high demand even at peak times, 400 V models of the WMF espresso can simultaneously dispense coffee drinks, hot water and steam for milk foaming. This is made possible by the optimised boiler, which delivers an increased heating power of 6 kW.

Versatility our innovations, your way

WMF espresso

#### MANUAL INSERT OF FURTHER COFFEE TYPES

. . . . . . . . . . . . . . .

. . . . . . . . . . . . . . .

. . . . . . . . . . . . . . .

The manual insert offers your customers the benefit of greater choice, by allowing you to add ground coffee from an external grinder directly into the portafilter and brew it using the WMF espresso.

. . . . . . . . . . . . . . . . .

. . . . . . . . . . . . . . .

#### **AIR-COOLED BEAN HOPPERS**

. . . . . . . . . . . . . . . .

. . . . . . . . . . . . . . . . . .

. . . . . . . . . . . . . . .

As standard, the machine comes with two concealed, air-cooled 550 g bean hoppers, allowing you to store two different types of coffee, for example espresso and Café Crème, keeping them fresh and aromatic all day. The internal hoppers offer the advantage of saving space and allowing you to store and heat coffee cups directly above the machine.

#### AUTOMATIC OR TRADITIONAL MILK FOAM PREPARATION

The WMF espresso can produce three different consistencies of milk foam automatically at the touch of a button, with the Auto Steam wand. Or the operator can choose to foam milk manually with the second Basic Steam wand. An experienced operator can even create latte art, in traditional barista style.

#### ADJUSTABLE HOT WATER OUTPUT

Hot water can rapidly be dispensed, and the quantity individually adjusted by the user, offering an efficient and user-friendly way to prepare beverages other than coffee. What's more, the temperature can be individually regulated for each beverage, for example black or green tea.

#### **EXTERNAL BEAN HOPPERS**

Offering the benefits of extra capacity, space efficiency and added flexibility, the WMF espresso is now available with the option of two large visible bean hoppers, which can hold, for example, espresso and Café Crème beans respectively. At a height of 128 mm, each offers a capacity of 1100 g.

#### **3 DIFFERENT PORTAFILTERS**

The WMF espresso comes with 3 different portafilters in different sizes - two standard doubles and 1 standard single. The machine automatically recognises which portafilter has been inserted and displays only the possible beverage selections for that portafilter size.

### ENGINEERED FOR CONSISTENT PERF

............

#### STEAM JET

. . . . . . . . . . . . . . . .

Featuring advanced WMF technology, the practical SteamJet takes just a few seconds to warm up to two cups simultaneously at a touch using natural steam. So every drink is not only served at the ideal temperature but also remains hot for longer, for true coffee perfection.

. . . . . . . . . . . . . . . . . .

. . . . . . . . . . . . . . . . .

. . . . . . . . . . . . . . . .

#### DYNAMIC COFFEE ASSIST

Fitted as standard, intelligent Dynamic Coffee Assist technology continuously measures brewing time, automatically adjusting the most important factors for coffee quality, like grinding degree and grind quantity. This way, extraction time remains stable, ensuring that every cup of coffee is just as delicious as the last - consistently.

#### HEIGHT ADJUSTABLE CUP GRID

The cup grid can be manually adjusted towards the fixed spout to ensure the optimal height for each espresso. So beverage temperature remains ideal, unsightly splashes of coffee are eliminated, and the crema on top of each espresso is perfect.

#### HEATABLE CUP STORAGE

On models with concealed bean hoppers, the practical heatable cup storage keeps your cups close to hand, conveniently on top of the machine so no additional space is required. Better still, they are always pre-heated and ready to keep each cup of coffee warmer for longer.

#### FEATURES & INNOVATIONS

#### INDIVIDUAL TEMPERATURE REGULATION

With the WMF espresso, the brewing temperature can be individually set for every beverage recipe, so each drink is served at its own ideal temperature.

## Usability ALL THE FUNCTIONS YOU NEED AT YOUR FINGERTIPS

. . . . . . . . . . . . .

WMF espresso

#### TRADITIONAL PORTAFILTER MACHINE LOOK AND FEEL

. . . . . . . . . . . . . . . . . .

With its classic design, portafilter handling, and choice of manual or automatic milk foaming, the WMF espresso exudes coffee culture appeal, looking and sounding like a traditional machine. But at the same time, it offers all the advantages of perfect automated espresso preparation, from simple handling and minimal operator training to the guarantee of consistent coffee quality.

#### BEVERAGE SELECTION

From the quantity of coffee grounds to the beverage temperature, the key variables for each recipe are set duration installation and can then be individually customised by the user for each drink. For example, the amount of water used to prepare each drink can be chosen independently for each brewing group, by simply selecting one of the three option buttons above each brewing group (for preparing normal espresso, ristretto or lungo).

#### PEEK STEAM OUTLET

It is also possible to fit the WMF espresso with an Auto Steam wand made of an advanced, high-temperature-resistant polymer known as PEEK. The advantage of this material is that it is resistive to milk, making for easier cleaning of the steam wand.

The attractive touch display provides a simple, user-friendly way to adjust a wide range of software setting options, while additional touch-sensitive buttons offer key functions at a single touch and are easy to clean.

#### FEATURES & INNOVATIONS

#### AUTOMATIC CLEANING PROGRAM

The WMF espresso is fitted with its own automatic, HACCP-compliant cleaning system and features a handy dishwasher-suitable drip tray. Using a special soluble tablet placed in the portafilter, the system cleans and rinses the machine automatically. Only the steam wand must be cleaned manually.

#### TOUCH DISPLAY AND BUTTONS

#### **COLOURS FOR EVERY TASTE**

Choose from a variety of colours, from classically elegant to vividly modern, to customise your WMF espresso. Whether you want it to blend in or stand out, it will enhance any ambience.

. . . . . . . . . . . . . . . . . .

#### **BARISTA BUTTON**

The barista button at the bottom of the touch display (indicated by three coffee beans) lets the operator easily increase or reduce the quantity of ground coffee by 15% for the next beverage in either or both portafilters, for a perfectly customised coffee experience.

FEATURES & INNOVATIONS

#### **REAR SIDE ILLUMINATED** BY LED

The WMF espresso is illuminated at the back with LED panels, and you can choose the colour of the illumination to suit the decor of your venue.
