The new WMF 5000 S

More indulgence per hour.
Coffee to

go, go, go

Because indulgence now has pace. The new WMF 5000 S.
What inspired WMF to develop the fully-automated WMF 5000 S?

New technology makes us feel we can live life faster. We're no longer prepared to wait. We expect instant gratification — the products we order, instantly delivered. With the WMF 5000 S, it is precisely this need we are addressing: we’ve developed a machine that packs the performance capacity of a large, fully-automated coffee machine into a slim, sleek appliance. With the WMF 5000 S, we are offering a machine that not only makes fantastic coffee, but produces consistently high quality faster — and is easy to use, to boot.

Which particular features make the WMF 5000 S so unique?

Our technical innovations play a key role here. The machine benefits, for example, from a high-performance brewer that is generally only used in large coffee machines. This reliably ensures high-speed, top quality coffee over the long haul. Equally, the Dynamic Milk system, which prepares hot and cold milk, as well as a full range of hot and cold milk foam consistencies, guarantees a completely natural milk flavour. That’s how we satisfy every individual customer taste and requirement.

Why should no business be without a WMF 5000 S?

Quite simple. The WMF 5000 S has an inbuilt recipe for success: The more indulgence created per hour, the greater your daily turnover. And that should appeal to anyone wanting to achieve business success through sheer love of coffee.

Johan van Riet, President Global Coffee Machine Business

“People today expect their every desire to be instantly fulfilled.”
Endless specialities.
In a flash.
Prepare top quality. More quickly.

Sheer indulgence – express delivery

Because today – every second counts

One of the biggest challenges is being able to respond flexibly to peak service times. It’s not only a matter of staff organisation but also machine capacity. The WMF 5000 S ensures, for example, that during the morning rush hour on the streets, customers are all quickly served and satisfied. And that’s no longer down to staff, but a consistently top quality, high-speed preparation process. These are of course major success factors which facilitate higher turnover on a daily basis.

Pace you can depend on

The WMF 5000 S is like a loyal team member you can always depend on: pulling its weight and always fast enough when it counts. At the same time, it’s intuitive and easy to use. Just as staff aim to please customers with a friendly smile, this fully-automated team member gives you a perfectly tailored drink at the touch of a button – for each and every customer. The WMF 5000 S not only offers high performance, but can be cleaned efficiently and thoroughly. Because, as we know, nobody can afford to wait.

Many people drink their coffee on the way to work – Where every second counts!
Discover the new WMF 5000 S

Thanks to streamlined capacity via the fully automatic Thermo-Accent option, you are data virtually whenever and wherever you want.

Dynamic Milk provides hot and cold milk, hot and cold milk foam – fully automated through the beverage spout. The new cleaning process “Clean in Place” ensures time-saving HACCP-compliant cleaning without having to remove the milk foamer from the appliance and dismantle it.

The Steam Jet brings every cup to the correct temperature in a matter of seconds.

The illuminated side panel flash when action is required (e.g. when the coffee beans need refilling).

The Steam Jet brings every cup to the correct temperature in a matter of seconds.

With its impressively sleek dimensions, this head-turner makes room for additional coffee machines or add-on-devices.

Large, renewable, includeable product hoppers. The coffee bean hoppers are dishwasher-proof. Ideal for easy cleaning.

Rapid hot milk and foam at the push of a button – or the classic way with Auto Steam or Easy Steam.

The illuminated side panel flash when action is required (e.g. when the coffee beans need refilling).

Large touch display with clear menu structure. The digital operating manual ensures user-friendliness. All relevant information about a certain operation status via the automatic messages on the display.

You have the option of using keyboard layouts with both a different button arrangement and number of buttons, as well as various colour, backgrounds and transparencies. This enables users to select a single-tier self-service layout in the self-service area. You can also upload and insert your own beverage images.

No more easy coffee machines disrupting conversations – noise emission has been significantly reduced.

Premium materials such as stainless steel side panels or lids emphasize the machine’s professional appearance.

The Steam Jet brings every cup to the correct temperature in a matter of seconds.

No more easy coffee machines disrupting conversations – noise emission has been significantly reduced.

Perfectly coordinated add-on and vending devices alleviate labor and boost performance.

You can use the customer’s time and attention whilst their beverage is prepared for on-screen advertising in the self-service area.

Large, renewable, includeable product hoppers. The coffee bean hoppers are dishwasher-proof. Ideal for easy cleaning.

Thanks to telemetry capacity via the fully automatic Thermo-Accent option, you are data virtually whenever and wherever you want.
